ColdAvenger® Expedition Balaclava

\$79.95

ColdAvenger® Expedition Balaclava - High Performance Protection

- Made with Polartec® Wind Pro®, an extremely breathable fleece that is four times more wind resistant than classic fleece. Polartec® calls Wind Pro® the new "super fleece" because of its ability to perform in such diverse conditions and uses from outer wear to an insulating base layer
- The ColdAvenger® Expedition Balaclava design protects entire head from cold weather, sun and wind with an integrated fully removable ColdAvenger® ventilator
- While the ventilator is not designed to be used without the hood, the hood can be used without the ventilator

•
Soft medical grade and non-toxic polyurethane ventilator provides a comfortable seal while retaining it's inherent microbial resistance

•
Form-fitting design protects face, neck, ears and airway from cold weather

•
ColdAvenger® ventilator allows you to breathe freely during outdoor activities while managing exhaled moisture off the facial skin

•
Fleece wicks away moisture to keep your face dry

•
Humidifies dry and cold inhaled air to protect and improve airway health in the cold

•
Keeps temperatures inside 40°F to 60°F higher than outside (difference relative to movement)

•
Designed to fit with goggles and helmets

•
Prevents fogging of goggles

•
Adjustable, removable interior valve controls up to 60% of air intake

•
Regular and Extra Large options*

*The inherent stretch of the Polartec® Wind Pro fabric used in the ColdAvenger® Expedition Balaclava allows for very universal sizing and the two sizes we offer will fit the majority of people. The "Regular" size is recommended for head sizes from 6 5/8" - 7 3/4". The "XL" ColdAvenger® Expedition Balaclava is perfect for those who choose to layer, or whose head size is larger than 7 3/4".
